TESTING AND LEARNING

The feedback we got we is that the people like the colours and the simplicity of the design. But there are few confusions: they do not really know what does the "IN" button means and how to go to back to the profile page. Also there were some sonfusions at the calendar sections. We might make it even more simplier. There are pages where the "back"button is missing. We will consider to put the languages option as well.
On the profile page we might change the visibility of the portfolio's availability.
